

## SPECIFICATION

### EXTERIOR

#### FUEL FILLER CAP

The fuel filler cap has been precision-machined from a solid billet of aluminium, before being polished and finely detailed with a debossed emblem.

#### SCULPTED HALF BUMPERS

The evocatively styled half bumpers provide protection and style through one elegantly shaped sculpture.

#### FRONT AND REAR PARK AIDS

Ultrasonic sensors embedded in the front and rear bodywork warn of nearby objects with a corresponding visual display.

### INTERIOR

#### SUPERIOR CRAFTSMANSHIP

Immerse yourself in a cabin where the finest materials meet the best in contemporary design. Extensive use of leather, hand-crafted wood veneers and warm nickel finishes create an opulent experience.

#### SUPERIOR SEATING

Heated and cooled, classically styled front seats, upholstered in luxurious soft-grain leather, with 16-way power adjustment and memory function are standard in Speedback.

#### STEERING WHEEL

Wood-rimmed steering wheel with integrated controls and paddle change gear selector add additional convenience and dynamism to your drive.

### DRIVING DYNAMICS

#### ADAPTIVE DYNAMICS

Speedback's Adaptive Dynamics system constantly monitors driver and car inputs, changing the individual damper settings to enhance the car's handling characteristics.

#### DYNAMIC STABILITY CONTROL

A fully automated Dynamic Stability Control (DSC) system in Speedback maximises stability and improves traction and directional control in difficult driving conditions. For a more competitive drive, the system can be switched to Trac DSC to enable variable slippage and wheel spin.

## SAFETY & SECURITY

### DYNAMIC SAFETY TECHNOLOGY

Dynamic sensors calculate driver's weight, seat belt status and driving position in order to deploy the driver's airbag in the most efficient way to reduce the severity of an impact.

### ANTI-LOCK BRAKING

Brake pressure is varied during an emergency stop to prevent locking and maintain steering control. On detection of unusually heavy braking, the system applies extra braking assistance.

### YOUR SECURITY

The door locks, alarm and immobiliser are activated via Speedback's smartkey. At a predetermined speed, the doors will lock automatically. The smartkey also enables activation of the headlamps from a distance as you approach your vehicle at night.

## MULTIMEDIA

### AUDIO CHOICES

A choice of audio sources and multi-speaker design with high powered dome tweeters equip Speedback with a surround sound system that will fill the cabin with all-encompassing quality acoustics.

### SATELLITE NAVIGATION

The touchscreen-controlled satellite navigation system receives external information which is then added to entered destinations for a more convenient and dynamic journey.

## SPECIFICATION

### STYLE

#### NICKEL-PLATED SIDE STRAKES

Side repeaters are encapsulated within precision-machined and nickel-plated side strakes, created from a solid billet of aluminium.

#### POLISHED TAILPIPE FINISHERS

Polished stainless steel tailpipe finishers add further style, sportiness and refinement to your Speedback.

#### WIRE WHEELS

19" wire wheels with finely detailed engraved badge or a 20" alloy wheel option.

#### SCULPTED DOOR HANDLES

Speedback's sleek exterior door handles evoke memories of classic styling and are finished to bring additional depth and warmth to Speedback's exterior.

#### SPLIT TAILGATE WITH FOLD-OUT PICNIC SEAT

Speedback's split tailgate optimises access to the rear luggage area and allows for the deployment of Speedback's unique rear picnic seat.

### COMFORT

#### PREMIUM LEATHER MAT SET

Premium leather mat set and British saddle leather front and rear footwell mats.

#### LUGGAGE COMPARTMENT

Premium floor covering made from British saddle leather.
