ORIGINAL REMASTERED

A woman with dark hair, wearing a tan leather jacket, a blue denim skirt, and black high-heeled shoes, is sitting on the front fender of a blue Mini car. The car is parked on a street in front of a brick wall with two windows. The car has a white roof and silver alloy wheels. The scene is brightly lit, suggesting daytime.

LABOUR OF LOVE

Mini Remastered by David Brown Automotive has been painstakingly handcrafted to create a contemporary design classic.

CRAFTSMANSHIP

Inspired by Sir Alec Issigonis' classic icon, our experienced design and engineering teams work meticulously to remaster the vision to meet the demands of modern life.

With mass-production comes compromise. By contrast, our low-volume, handcrafted Mini Remastered is built to the highest standards using a combination of traditional coachbuilding techniques and state-of-the-art manufacturing processes.

Our engineers scrutinise all aspects of the car from the ground up. The result is a completely new structure and exterior body shell. De-seamed, strengthened and sound-proofed throughout, Mini Remastered not only looks great, but offers refinement and comfort.

A full anti-corrosion E-coat, followed by a meticulous hand-applied paint process, taking over four weeks to complete, ensures that every car is not only flawlessly finished but protected for a lifetime.

LIVIN' FOR THE CITY

Punchy, dynamic and nimble. The perfect companion for around town.

Change lanes, turn heads and take on the city.

Laguna Sunrise Exterior Finish / 12" Classic Alloys - Silver

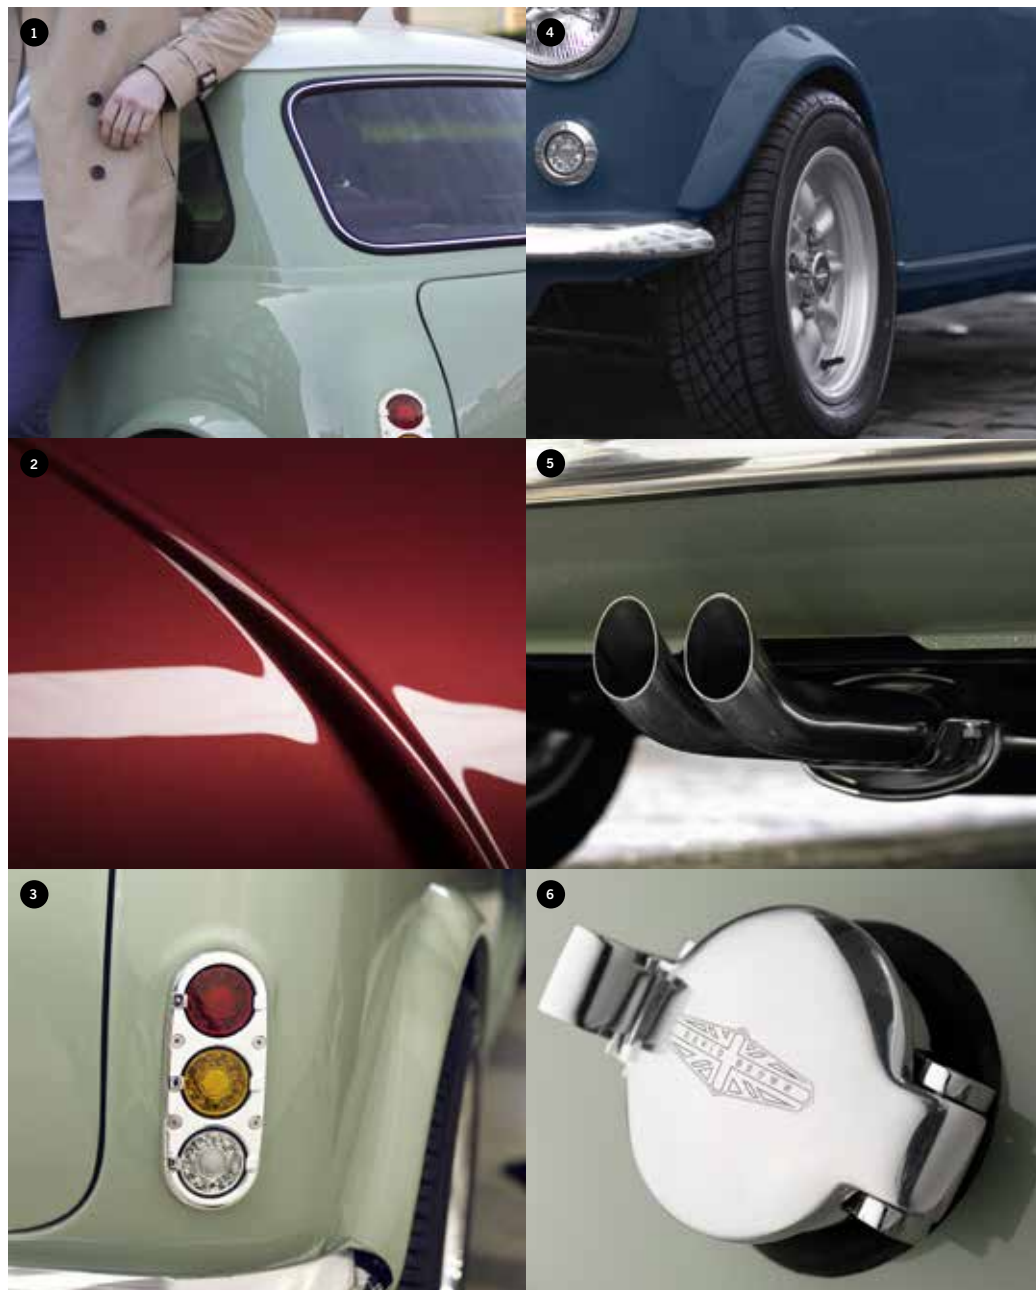

The original engine has undergone a complete transformation, having been completely rebuilt with brand new parts throughout and tuned to perfection. The standard car now produces over 30% more power than the original unit. The engine's outer body has been sandblasted, powder-coated and painted, whilst the oil filler cap is colour-matched with the car's exterior paint selection.

The power increase is perfectly mated to a four- or five-speed manual, or four-speed automatic transmission that channels the car's energy through every shift, encouraging you to change gear, simply for the pleasure of it.
